This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 106
Reference code for Topic 106: REF-6D04850891
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 107
Reference code for Topic 107: REF-AC92FF1D74
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 108
Reference code for Topic 108: REF-5091D6D381
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 109
Reference code for Topic 109: REF-B0A6525B9D
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 110
Reference code for Topic 110: REF-0CFFF4CBA7
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 111
Reference code for Topic 111: REF-BDDD167D39
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 112
Reference code for Topic 112: REF-F0518997D6
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 113
Reference code for Topic 113: REF-6AFCC787E3
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 114
Reference code for Topic 114: REF-88B3FBE35F
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 115
Reference code for Topic 115: REF-62A597A0BB
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 116
Reference code for Topic 116: REF-5132F01F54
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 117
Reference code for Topic 117: REF-8FBB798424
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 118
Reference code for Topic 118: REF-039BE7BDC8
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 119
Reference code for Topic 119: REF-9F43525D59
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.

PUBLIC SYNTHETIC COURSE SOURCE
Topic 120
Reference code for Topic 120: REF-C3B6D30F7A
This code is an invented lookup fact for software evaluation.
No instructor birth dates are provided anywhere in this source.
Algebra method: factor a quadratic and substitute each root into the original equation.
